Blueair's most advanced air purifier ever, HealthProtect™, is the only air purifier to provide 24/7 protection against viruses and bacteria.

Every component is uniquely engineered in Sweden to silently provide the highest performance and energy efficiency. The HEPASilent Ultra™ filtration technology combines electrostatic and mechanical filtration to kill 99% of germs and remove dust, pollen, dander, mold, VOCs, and odors. Even when on standby, GermShield™ technology proactively monitors your room and automatically activates when conditions are optimal for germ growth. Unlike other air purifiers that only push clean air to a small part of the room, SpiralAir™ quickly circulates more clean air to every corner of the room.

HEPASilent Ultra™

Every component of HEPASilent Ultra™, Blueair's most advanced filtration technology, is uniquely engineered in Sweden to provide the highest performance and energy efficiency. HEPASilent Ultra™ uses electrostatic and mechanical to fill your room with more clean air. Silently.

GermShield™

Even when your unit is on standby, GermShield™ proactively monitors your room and automatically activates plasma charging when conditions are ideal for growth, killing existing viruses and bacteria. A gentle stream of air then ensures no new growth.

SpiralAir™

Unlike other air purifiers that only push clean air to a small part of the room, the SpiralAir™ air outlets are uniquely engineered to deliver 360° omni-directional airflow- quickly circulating the air to every corner. Ensuring you breathe clean, healthy air wherever you are.

Freedom to breathe

Blueair was founded on the firm belief that the freedom to breathe is a basic right. Over two decades ago, our Swedish founder set out to make the world's best air purifier. By bringing together a team of talented designers and filtration experts who shared his passion for sustainability, quality and design, the Blueair air purifier was born.

Today, our award-winning air purifiers are still designed in Sweden to create the safest environment for children to develop and grow – while making the least impact on the environment.

We will never stop fighting for your freedom to breathe.
